Art Unit: 2166

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-11 and 19-31, drawn to methods and computer encoded instructions for organizing information and assigning percentages, classified in class 705, subclass 40.
- II. Claims 12-18, drawn to a computer based information management system, classified in class 700, subclass 92.

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the apparatus can be used to practice materially different processes, such as word processing, performing scientific calculations, preparing electronic mail, computer programming, playing video games, or retrieving content from the Internet.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
